

CV Prof. dr. Jan Busschbach

Prof. dr. Jan Busschbach is professor of health related quality of life; the director of the Department for Medical Psychology and Psychotherapy (MPP) of the Erasmus MC in Rotterdam and Managing director of the Viersprong Institute for studies on Personality Disorders (VISPD). His research focus is on health related quality of life and the (cost-)effectiveness of different forms of psychotherapy. Jan Busschbach is the chair of the EuroQol Foundation that distributes the world leading quality of life questionnaire in health economics: the EQ-5D. He is a member of the committee that advises the Dutch Health Care Insurance Board on reimbursement of new drugs (CFH). He has a special interest in the operationalisation of other than cost effectiveness arguments in reimbursement decisions, like distributional and ethical arguments.
